

Section 7 — Office Furniture Accessories

Cableflex 8000™

This European designed cabling system integrates great style with incredible functionality. With it's flexible to rigid interlocking units, Cableflex easily adapts to verticle or horizontal mounting environments.

Cableflex is capable of shielding up to 12 cables separately within its housing unit. This allows you to add or remove individual cables easily and with each cable separated, the system is compliant with new safety regulations.

Each standard kit (8080.001) includes:

- 15 8080.058 Interlocking units
- 1 8081.001 Desktop attachment
- 1 8082.0001 Weighted base foot
- 2 8083.001 Lateral attachment hooks

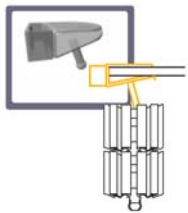

Other accessories are available as shown. Special combinations, packaging options, and colors are available when 300 or more kits are purchased. The entire range of RAL colors are produced in nylon and transparent colors are made of polycarbonate.
