Electrical Power Supply

Whisper-Ride was designed and developed by Wood Technology, Inc. and the Danish firm ConSet with these basic principles in mind; Quality, reliability, simplicity, affordability, design and function. With the installer and consumer in mind the unit can be fitted inside a cabinet or against any suitable surface within minutes by simply screwing in the TV lift unit, power supply and RF module. Once you make a few simple connections and position the universal mounting brackets the TV is ready to be secured. Mounting can also be reversed to allow Whisper-Ride to drop down. With Wood Technology's 30 year experience and ConSet's engineering expertise it's a perfect fit for flat screen TV's up to 50 inches. Please note that due to the 29.5" (750mm) stroke some 50" models may not be suitable.
